

MPOT POTENTIOMETER MODULE

10K-Ohm/270 degree with relay

270° potentiometer with relay contact 10 kΩ

The 10-turn potentiometer has a decimal scale and locking lever

The potentiometer modules are fitted with standard values. They are available as 270° potentiometer and as 10-turn potentiometer with fine adjustment. They can be operated with 10 V DC or 24 V DC. A resistor reduces the voltage so that a 24 V DC voltage can be reduced to operate between approx. 0...11 V. The connection is via terminals. A set-point can also be switched-on using an integrated relay and separate output. Several elements can be daisy-chained.

customs tariff number	85334010	
GTIN	4048879041607	
Packaging unit	1	
Electrical data		
Power max.	1 W	
Linearity	±3 %	
Resistance	10 kΩ	
Resistance tolerance	20 %	
Electrical data Input		
Input voltage DC	24 V	
Input current	20 mA	
Power loss max.	0,25 W	
Electrical data Output		
Voltage switching DC min.	10 V	
Switching voltage DC max.	24 V	
Switching current min.	1 mA	
Switching current max.	1 A	
Diagnostics		
Status indication LED	green	
Mechanical data Material data		
Material contact	Pd Ni-Au Rh	
Mechanical data Mounting data		
Mounting method	geschnappt	
Suitable for mounting type	mounting rail, (EN 60715)	
Height	75 mm	
Width	45 mm	
Depth	65 mm	
Environmental characteristics Clir	atic	
Operating temperature min.	0 °C	
Operating temperature max.	60 °C
